

SCHAEFFLER

**Time to replace your worn machine tool bearings?
Now is not the time to replace them with the same
bearings that just gave out on you.**

Now is the time for Schaeffler bearings.

Schaeffler, makers of world-renowned INA, FAG and Barden bearings, offers one of the most comprehensive lines of bearings for machine tools available anywhere. Regardless of whether your machine came from the U.S., Japan, Korea, Germany or anywhere else, Schaeffler can satisfy virtually any bearing need, enabling MRO users to fulfill all their machine tool requirements from a single source.

Whatever your application - from turning machines to multi-axis mills to woodworking machines - Schaeffler has the precision bearing solution that's right for you:

- High-Precision Spindle Bearings
- Ball Screw Support Bearings
- Profile Rail Linear Guides
- Linear Bushings
- Cam Followers
- Precision Locknuts
- Ball Screws

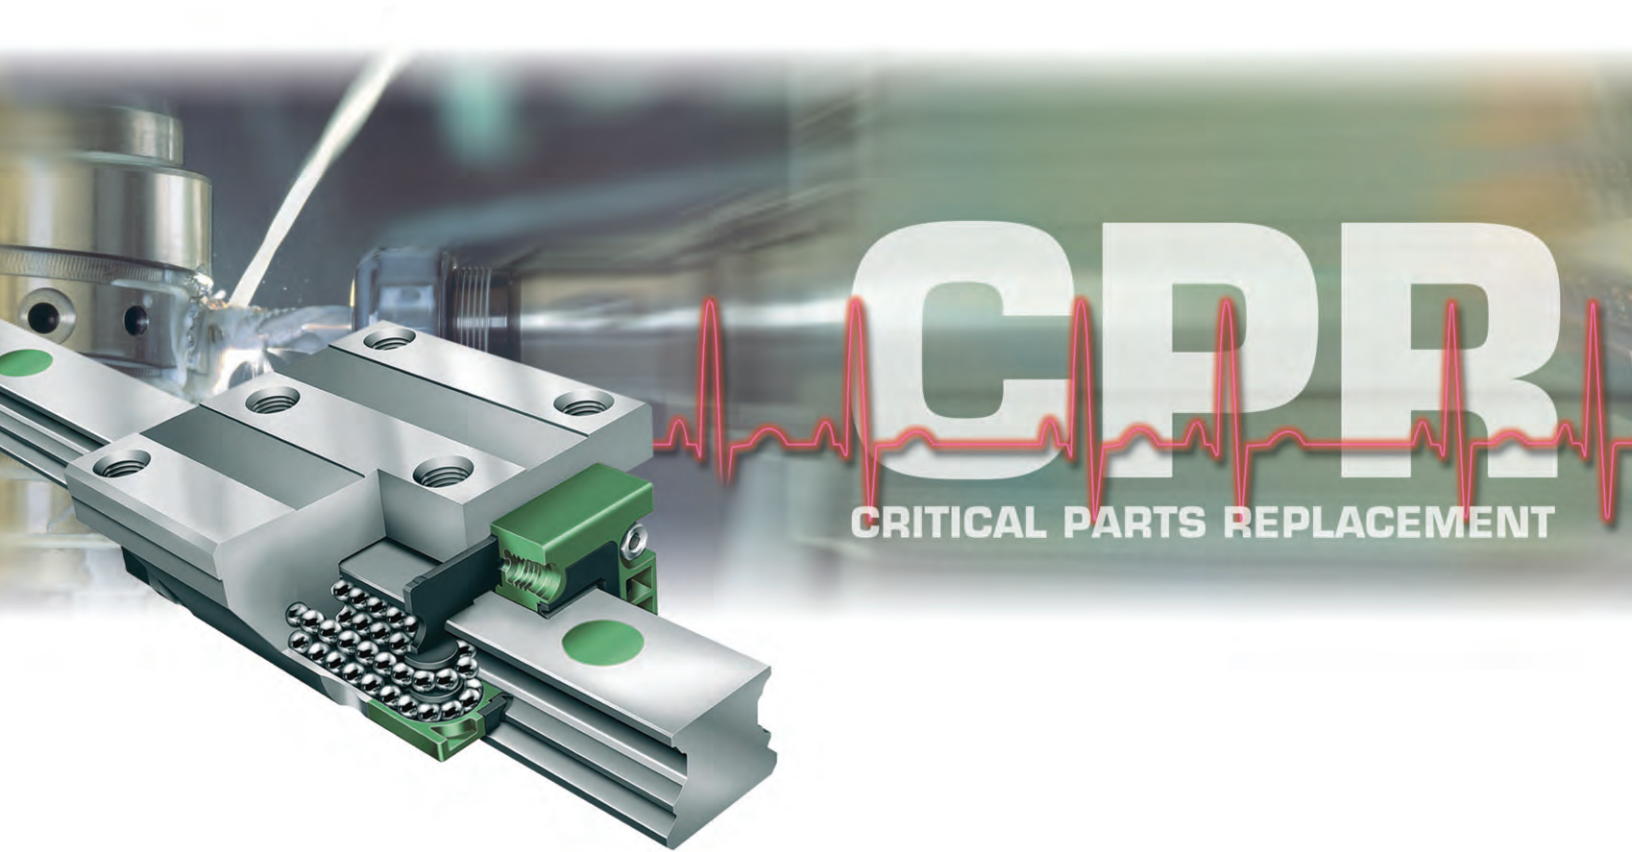

So don't just replace your worn machine tool bearings.
Upgrade them - to Schaeffler quality.
