

STANDARD TAPERED ROLLER BEARINGS FOR STEEL MILL APPLICATIONS

Steel manufacturing equipment comprises an enormous line system that operates continuously 24 hours a day. Every component of this system must be counted on to provide reliable service. NTN offers the highest quality tapered roller bearings to ensure reliable performance and long life.

Superior Line Of Products

NTN offers a wide array of standard tapered roller bearings to fit a number of steel manufacturing applications, including single-row and double-row tapered roller bearings. In addition, NTN produces four-row tapered roller bearings for crucial roll neck applications in a number of sizes and configurations. No matter what the application, NTN has a bearing to fit your needs.

Made in the USA

NTN is the second largest producer of tapered roller bearings worldwide. Our production facilities include two NTN plants in Macomb, IL and Hamilton, AL dedicated to the production of tapered roller bearings. With our local production and ever-expanding line of products, NTN is prepared to serve the demands of the steel industry.

Features & Benefits

- American-made product available
- Wide availability of sizes and styles
- Case carburized ring and roller material
- High capacity for radial, axial, and combined loads

NTN's uncompromising quality and reliability will help maximize your uptime and reduce maintenance costs.
