Advanced bearing technologies & value-added services

A forward-thinking bearing manufacturer

NTN Bearing Corporation of America is a leading manufacturer of anti-friction bearings and constant velocity joints in the United States. As the American operating company of NTN – one of the world’s largest bearing producers – we give you the core values of a leading global brand, combined with the flexibility and responsiveness of a trusted local partner.

Our company operates eleven state-of-the-art plants in the USA and Canada, and over 80% of the products sold in the United States are locally produced. To ensure prompt, off-the-shelf service at any time, anywhere in the country, we make our products available through an extensive network of distributors across the country.

NTN is a dynamic, future-minded American manufacturer that utilizes the six sigma quality approach in its constant pursuit of technical and operational excellence. Whether you are an OEM, distributor, or end user, you can rest assured that all our efforts are focused on one goal: to provide the most reliable and cost-effective solutions for your bearing needs.

US Sales Offices

NTN warehouses are strategically located across the country. They carry an extensive inventory to help reduce your freight costs and meet your demanding delivery schedules. Please contact your closest sales representative directly or any questions regarding products, availability, selection, pricing, delivery, replacement parts, and service.

Commitment to research and innovation

NTN is a company focused on developing unique technical solutions to address the ever-changing needs and challenges of our customers. Our R&D efforts have led to proprietary technologies such as HL™ surface treatment for poor lubrication conditions, AS™ heat treatment for improved durability and XL100™ optimized design for high-load applications.

We have also designed innovative bearing assemblies, which incorporate the bearing’s mating components and provide for total bearing performance. These assemblies often replace multiple parts, reducing costs and providing for improved performance.

NTN’s current value-added assembly designs range from lawn mower spindles to large truck wheel hubs, but the possibilities are endless.

Contact NTN's Customer Service Center

NTN is a dynamic, future-minded American manufacturer that utilizes the six sigma quality approach in its constant pursuit of technical and operation excellence. Whether you are an OEM, distributor, or end user, you can rest assured that all our efforts are focused on one goal – to provide the most reliable and cost-effective solutions for your bearing needs.
One of the broadest product lines in the industry
NTN's core business has always been bearing manufacturing. With a wide range of rolling bearings and plain bearings, NTN is a leading supplier in the global bearing industry and the choice of many original equipment manufacturers (OEMs) and repair shops throughout the world.

Focusing on the automotive demands of the future
As a TS-16949 certified manufacturer with special focus on the automotive market, NTN is engaged in the engineering of automotive parts that increase driving efficiency and lower fuel consumption. NTN supplies CVJs and other related products to major manufacturers around the world.

Preparing for tomorrow with today’s technology
In order to meet the changing needs of today's market, NTN supplies a full line of advanced CVJs and other related products to major manufacturers around the world. Our products include CVJs for half-shafts and propeller shafts, as well as a full line of precision bearings.

Serving a wide range of industries
NTN bearings and related products are supplying manufacturers in a variety of industries with highly reliable bearing solutions. For more information, refer to the NTN Product Database online.

Conquering the environment
All NTN plants are certified to the environmental management system standard ISO 14001, which is the international standard for environmental management systems. By meeting these standards, NTN contributes to higher energy efficiency, lower emissions and lower resource consumption.

Value-added bearing solutions
NTN bearings have longer lifetimes and always meet or exceed ABMA standards. This allows you to reduce downtime and save on repair and replacement costs.

4. NTN bearings exhibit today's most advanced technologies – such as our sealed spherical bearings that save on maintenance and lubrication costs.

By choosing high quality NTN bearing solutions, you always add tangible value to your end product or service.
Inside with the environment
At NTN, we see the protection of the environment as one of the fundamental, long-term goals of our organization. As a company certified under the International Standard ISO 14001, we make a serious, constant effort to reduce energy consumption, recycle materials, and reduce the volume of exhaust and waste.

This commitment results in a series of efficient programs and initiatives implemented across all of our business operations.

One of the broadest product lines in the industry
NTN’s core business has always been bearing manufacturing and to this day, NTN is one of the most trusted brand names in the market. Over the years, our extensive experience and in-depth knowledge of the bearing industry translated into continuous growth of our product portfolio.

NTN manufactures and offers one of the broadest lines of super precision and precision grade ball and roller bearings available from a single source supplier. We also offer top-quality mounted bearing units as well as a full line of constant velocity joints for half-shafts and propeller shafts.

Our comprehensive portfolio of premium products includes:
- Angular Contact Ball Bearings
- Agricultural & Farm Implement Bearings
- Cylindrical Roller Bearings
- Automotive Bearings and CVJs
- Tapered Roller Bearings
- Electric Motor Bearings
- Needle Roller Bearings
- Heavy Industrial Bearings
- Spherical Roller Bearings
- Machine Tool Bearings
- Ball and Roller Bearing Mounted Units
- Micro and Miniature Ball Bearings

Serving a wide range of industries
Our bearings have an effect on and relate closely to the worldwide demand for better quality, durability, safety, and reliability of automotive, industrial, and agricultural equipment. This means all of our products benefit from NTN’s quality, experience, and technical know-how in the source of natural and engineered materials.

As a company certified under the International Standard ISO 14001, we make a serious, constant effort to reduce energy consumption, recycle materials, and reduce the volume of exhaust and waste. This commitment requires our constant re-evaluation and adjustment of all our business activities to ensure that we meet today’s needs without compromising the ability of future generations to meet their own needs.

1. NTN doesn’t just ship you component products, we supply you with value-added bearings.
2. NTN bearings can be safely taken directly to your production lines without incurring incoming inspection costs.
3. NTN bearings exhibit today’s most advanced technologies – such as our sealed spherical bearings that save on maintenance and lubrication costs.
4. NTN bearings have longer lifetimes and always meet or exceed ABMA standards. This allows you to reduce downtime and save on repair and replacement costs.

Value-added bearing solutions
Our comprehensive portfolio of premium products includes:
- Radial Ball Bearings
- Ultra-Class™ Bearing Units
- Angular Contact Ball Bearings
- Agricultural & Farm Implement Bearings
- Cylindrical Roller Bearings
- Automotive Bearings and CVJs
- Tapered Roller Bearings
- Electric Motor Bearings
- Needle Roller Bearings
- Heavy Industrial Bearings
- Spherical Roller Bearings
- Machine Tool Bearings
