

SKF SYSTEM 24 TLSD Series

Electro-mechanical single
point automatic lubricators

Electro-mechanical single point automatic lubricators SKF TLSD series

The SKF TLSD series is the first choice when a simple and reliable automatic lubricator is required under variable temperatures, or when the application conditions (such as vibration, limited space or hazardous environments) require a remote mounting.

- Filled with SKF Lubricants especially developed for bearing applications.
- Temperature independent dispense rate.
- Maximum discharge pressure of 5 bar over the whole dispensing period.
- Dispense rate available in various settings.
- Transparent reservoir allows visual inspection.
- Red-yellow-green LEDs indicate the lubricator's status.
- Refill sets include battery pack.
- Special product version offering for cold conditions.
- Supplied with support flange for enhanced sturdiness.
- Suitable for both direct and remote installation.

Typical applications

- Critical applications where extreme reliability and additional monitoring is required.
- Applications in restrictive and hazardous locations.
- Applications requiring high volumes of lubricant.

SKF DialSet helps to calculate the correct dispense rate.

250 ml unit

Settings and display features

- A** The transparent cap ensures easy visual monitoring of the lubrication settings.
- B** The unit can be programmed to dispense lubricant in 1, 2, 3, 4, 6, 8, 9, 10 and 12 month settings.
- C** The same drive unit can be used with both cartridge versions by simply adjusting the 125/250 ml switch.
- D** Traffic light LEDs are visual from all sides because of the presence of dual LEDs on the sides of the lubricator. The meaning of the lights is as follows:
 - **Green light:** The lubricator is properly functioning.
 - **Yellow light:** The lubricator is still functioning, but soon some action will be required. Yellow light serves as a pre-warning light.
 - **Red light:** The lubricator stopped operating.
